Installation

Installation of Easy-Lock sport floors is very simple and fast. Install mats as puzzle without glue and cut edges with knife for floors. Please call for our installation guide.

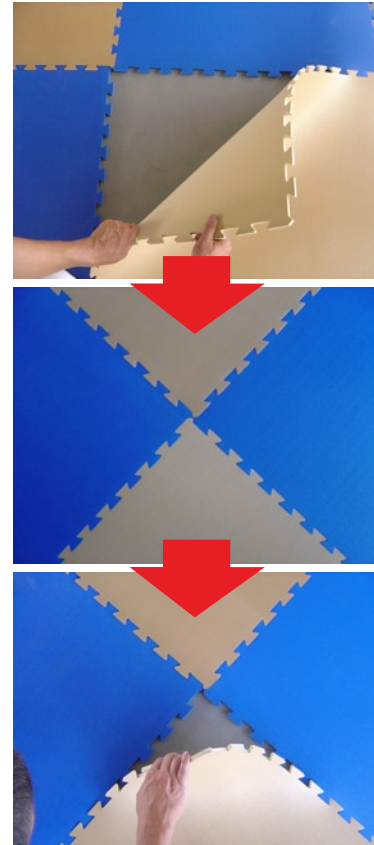

Air Care® System is unique technology using air bubbles contained in Easy-Lock sport floors to protect you while exercising. It protects joints and muscles against injuries and overloading and features new healthy exercising.

How does it work?

Millions of air bubbles absorb and return energy caused by movement, depending on body weight and jump. Shocks are distributed evenly to the floor, so there is no stress for your feet and bones.

Parquet, PVC and carpets which are commonly used for exercising, are not able to absorb the shocks so they cause fatigue, sprain and other injuries.

Floor Mats

We offer a complete range of safety matting all constructed in uk using robust resilient foams, bonded with flame retardant heavy duty PVC fabric covers and reinforced hard wearing latex anti slip bases'.
